- All tender prices should be valid for a minimum period of thirty (30) days from date of tender.
- ALL TENDER RESPONSES SHOULD BE COMPLETED ONLINE AND NO FAX SUBMISSION WILL BE ACCEPTED BY SUPPLY CHAIN UNIT.

# Specification for Repair and Service of Portable Water Pumps

## 1. Scope of work.

The supplier shall carry out a complete inspection, service, repair, and functional test of the portable water pumps.

**The water pumps have been reported as failing to start**. The supplier shall diagnose the fault and restore the pumps to full operational condition in accordance with the original or equivalent equipment manufacturers (OEM) specifications.

## 2. Inspection and Fault Diagnosis.

Upon receiving the water pump, the supplier shall:

- Conduct a visual inspection of the complete water pump assembly.
- Inspect the motor, electrical system, controls, switches, wiring, connections, guards, frame, impeller, and associated components.
- Diagnose the cause of the failure to start.
- Identify any worn, damaged, defective, or redundant components that may affect safe and reliable operation of the water pump.
- Provide a report detailing the fault identified and corrective work undertaken.

## 3. Strip, Service and Replacement of components.

The supplier shall strip the water pump as necessary to facilitate complete inspection and service.

All defective, damaged, excessively worn, or redundant parts shall be replaced.

Replacement components shall be:

**OEM parts wherever available;**

**Or**

**Equivalent parts of equal or better quality and specification** where OEM parts are unavailable.

No replacement component shall compromise the safety, performance, reliability, or manufacturer's intended operating characteristics of the water pump.

Public

The supplier shall ensure that all fasters, electrical connections, guards, bearings, switches, controls, and other relevant components are correctly installed and secured.

**4. Reassembly.**

Following completion of the repair and service, the supplier shall:

- Reassemble the water pump in accordance with the manufacturer's requirements.
- Check and secure all mechanical and electrical connections.
- Verify correct operation of all controls and safety devices.
- Ensure the impeller rotates freely without abnormal noise, vibration, or interference.
- Ensure all guards and protective devices are correctly fitted.

**5.Functional Test.**

Upon completion of the repair, the water pump shall be operated continuously for a **minimum period of 15 minutes**.

The 15-minute test shall be conducted under normal operating conditions without interruption.

During the test, the supplier shall verify that:

- The water pump operates correctly and reliably.
- The motor operates normally.
- The water pump maintains stable operation throughout the 15-minute test period.
- There is no abnormal noise, vibration, overheating, electrical fault, or other indication of malfunction.
- All controls and safety devices operate correctly.
- The water pump performs in accordance with the manufacturer's specified operating requirements.

If the water pump fails any part of the 15-minute test, the supplier shall rectify the fault, at his expense and repeat the test until the fan has demonstrated satisfactory continuous operation.

**6. Acceptance Criteria.**

The water pump shall only be considered **fully operational and acceptable** once it has successfully completed the required 15-minute continuous test and has been confirmed to operate in accordance with the **manufacturer's specifications**.

The supplier shall provide confirmation that the repair and service have been completed satisfactorily.

Public

**7. Service Report.**

On completion of the work, the supplier shall provide a service report containing, as a minimum:

- Water pump make, model, and serial number.
- Fault reported.
- Fault diagnosed.
- Work carried out.
- Parts replaced.
- Identification of OEM or equivalent replacement parts used.
- Result of the 15-minute continuous operational test.
- Any recommendations for future maintenance.
- Date of service.
- Name and signature of the technician responsible.

**8. Warranty.**

All repair work and replacement parts shall be covered by the supplier's standard workmanship and parts warranty. Details of the applicable warranty shall be provided with the service report and quotation.

The completed water pump shall be returned in a safe, functional condition and ready for service.

**9. Requirements.**

A Valid Trade certificate qualification must be submitted with the tender.

CIBD Grading EP 1 to be submitted with tender.

**Tenderers will be further evaluated only if they meet the minimum requirements stated below.**

- Brand name of item quoted must be stated on informal tender quote with submission on electronic system.
- Failure to meet the minimum requirements will deem tenderer non-responsive.
- Brochure/Sample of item may be requested from shortlisted tenderers, within 72 hours, failure to provide excludes from further consideration.
